

# Kids Day America 2019

September 28, Saturday from 10 a.m. – 2 p.m.

*Dedicated to Children's Health, Safety, Prevention and Environmental Awareness*

Sponsored By Wall Community Alliance and Garrow Family Chiropractic  
Participant: Wall Township Environmental Advisory Committee

The Environmental Committee uses an educational, hands-on, interactive model that teaches our children the effects of nonpoint water pollution demonstrating how storm water runoff carries pollutants through the watershed into our ponds or lakes.

**Bob Kilmurray, Vice Chair; WilmaMorrissey, Chairwoman; and Ellen Smith, Secretary**

Set-up Bob Kilmurray

Shirts, Bags, and Brochures

**Bob Kilmurray Setting Up Table**

**Photos of Children Learning About Water Pollution**

Children of all ages love creating rain water on the Enviroscape model as they learn about the pollutants harming the waterways.

This interactive, educational tool is a wonderful way for children to learn about non-point source pollution and how it affects their Wall community.

Carrie Balesterri demonstrating the EnviroScape

The Environmental Committee distributed reusable bags to be used instead of single use plastic bags. One of the favorite items in the green bags include metal stirrers along with recreational play items.

The Clean Communities Program, under Public Works, also provided the Environmental Committee with red “t-shirts” to distribute to attendees at Kids Day America. These shirts were initially distributed on “Wall Community Clean-up Day.
