

HYDRANT FLUSHING NOTICE

**BEGINS: MONDAY APRIL 4
THRU: FRIDAY MAY 6**

Wall Township's annual flushing of fire

hydrants removes minerals and sediment that build up over time and ensures that all fire hydrants are in good working order.

Please be advised that you may experience a drop in water pressure as well as some discoloration of the water during this process. Generally, this will clear up by running cold water for several minutes.

Although the water is safe to use during this time, residents should refrain from doing laundry when water is discolored and avoid running hot water, as mineral sediments can accumulate in your water heater.

Work will be conducted Monday through Friday from
8:00pm to 1:00am.
